Tree	 **Fagus sylvatica** EUROPEAN BEECH, COMMON BEECH
Description	Considered a stately tree grown for form and foliage, European Beech produce solid smooth-barked silver-grey trunks, broad rounded crowns, toothed oval leaves and branches down to ground level. They also produce small flower clusters in spring. Autumn colour is spectacular.
Foliage	Deciduous
Form	Horizontal Branching
Mature Size	20 x 10m
Uses	A great feature tree on its own or it can be pleached and/or clipped to form a hedge.
Position & Soil	They grow best in deep, fertile, moist, well-drained soil in a sunny position. They are surface-rooting trees, and the selected planting site should be in a sheltered spot. Trim lightly to allow the natural shape to develop.
Features	Giant Deciduous Horizontal Branching Shade Tree Specimen
Pot sizes in production	
Substitutes	• Carpinus betulus • Carpinus betulus fastigiata
