Eucalyptus pulverulenta 'Baby Blue' (Tree)

SILVER-LEAVED MOUNTAIN GUM TREE

This is a small-growing eucalypt usually seen as a tall, spreading shrub that retains its juvenile foliage into maturity. Young leaves, stems and inflorescences have a powdery white bloom. Foliage is strikingly silvery-grey and round in form. Cream flowers are produced between May and November and the large capsules that follow are cup-shaped.

This is a great accent tree with very distinctive foliage.

Requires well drained soil. Eucalypts require very little attention once established. Although the plant will continue to grow without fertiliser, it will tend to produce more leaves and flowers if fed with a slow-release native fertiliser.

Foliage	Evergreen
Form	Pendulous
Mature Size	6 x 3m
Family	Myrtaceae

Small **Evergreen** **Pendulous** **Avenue** **Feature Flower** **Feature Foliage** **Group Planting** **Informal Screening**

Native **Specimen**
