

Corymbia ficifolia 'Baby Orange'

This is a fantastic, heavy flowering, small grafted native that produces clear vibrant orange flowers in summer.

Uses

Grafted flowering gums provide an excellent choice for specimen plantings. They are smaller than natives used historically in the landscape and offer great flowering colour in summer.

Preferred Position & Soil

As this variety is grafted onto maculata rootstock, it is very tolerant of sun and most soil conditions.

Mature Height:	3-5
Mature Width:	3m
Form:	Round
Family:	Myrtaceae
Categories:	Evergreen, Native, Specimen, Tree-Feature Flower
