

Eucalyptus camaldulensis

Red River Gum

River Red Gums are widespread in the Australian landscape, most commonly found along stream banks and rivers or in flood plains. They grow very tall with most trees exhibiting a stripy bark revealing pale grey, charcoal and occasionally pink colourings. Foliage is relatively short and narrow.

Uses

As a big tree, it is most suitable for developments and landscapes that require a big native tree.

Preferred Position & Soil

While they tolerate most soil types, River Red Gums prefer well-drained sites in full sun or part shade.

Mature Height:	30m
Mature Width:	15m
Form:	Oval
Family:	Myrtaceae
Categories:	Evergreen, Native, Shade Tree
