

## Cool Natives that are really cool

Break up that green palette and be captivated by our Australian natives. Incorporate some of the cool blues and icy greens of our native trees which provide unique, year round beauty.

### **Eucalyptus leucoxydon 'Euky Dwarf™'**

This is a beautiful example of a cool coloured native. Great for contrast in the garden as a special feature and its open canopy offers good shade in hotter months. Masses of flowers from late autumn onwards. Our stock is very healthy both in numbers and in quality - but that is a given!

### **Eucalyptus cladocalyx nana DWARF SUGAR GUM**

Great looking foliage on a good all-rounder. This tree is stout and solid with grey coloured bark and glossy blue-ish green leaves. We have good numbers in 50 litre containers.

### **Eucalyptus polyanthemos RED BOX**

Another great selection for blueish - grey contrast in the garden. This tree has oval shaped greyish leaves with a short trunk. It bears small white flowers in Spring. Our main selling size for this tree is in 50 litre containers and this line is selling very quickly.

## **Corymbia citriodora 'Scentuous'** **syn. 'Dwarf Pink'**

This is one of our new lines that has been grafted onto Corymbia maculata so it is a sure-fire performer but in a more compact form. Leaves are narrow and highly aromatic. This tree features magnificent salmon pink bark. We are really excited about this variety and you will be too.

## **Waterhousea floribunda 'ST1'** **Whisper**

### **WEEPING LILLY PILLY**

A traditional performer for this time of year...Waterhousea floribunda has a wonderful weeping habit that makes it a very popular selection for a feature tree or screen. These go really quickly, so make sure to secure your order before they all go!

## **Angophora costata**

### **SMOOTHBARKED APPLE MYRTLE, RUSTY GUM**

Here is a tree much loved for its smooth bark, large and twisted limbs. Ours are looking fabulous and are ready to go in 50 litre containers.

## **Lophostemon confertus**

### **QUEENSLAND BRUSH BOX**

A rainforest tree native to the North-Eastern parts of Australia, this is a fast growing tree which is rarely affected by pests and diseases. Dome-like in shape, it develops a very dense foliage cover of dark green, leathery leaves providing good shade for the summer months. This variety rarely sheds limbs and has salmon coloured bark which flakes off over summer revealing orange-brown tones on the trunk. Summer also brings clusters of small white flowers whose stamens give them a decorative fluffy appearance.
