Landscape Solutions with Advanced Trees

At Speciality Trees, we use every snippet of information to offer a solution. Don't be afraid to ask lots of questions so your ultimate decision is the right one for you.

Acer platanoides 'Crimson Sentry'

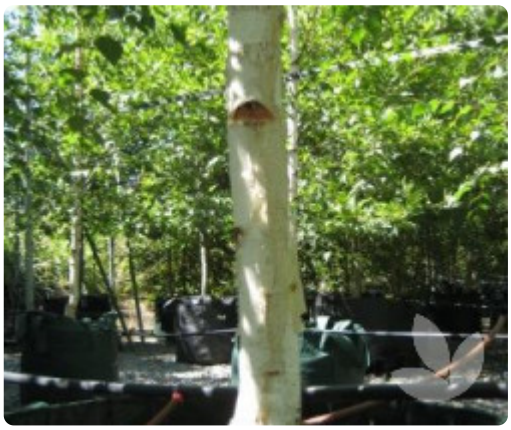
UPRIGHT CRIMSON NORWAY MAPLE TREE

Under the category of Feature Foliage, this deciduous Canadian Maple has deep purple foliage and grows to between 4-8 metres tall. A great tree for small to medium gardens looking for a unique focal point or point of difference. We have excellent stock in 50L containers.

Agonis flexuosa 'Burgundy'

BURGUNDY WILLOW MYRTLE TREE, WEEPING PEPPERMINT WILLOW TREE

Agonis flexuosa 'Burgundy' is a great selection if you are short on space but require big impact. Big and full with soft pendulous foliage we have great stock in 50 to 150 litres.



Betula pendula 'Moss White'

MOSS WHITE SILVER BIRCH TREE

If you are looking for a specimen with interesting bark, we ask that you consider the white trunks of Betula pendula 'Moss White'. Growing 8-12 metres tall, planted either singularly or in groups these trees are stunning. They are deciduous so the effect of the white trunk during the winter months adds another dimension to the garden.

Corymbia ficifolia 'Calypso'

GRAFTED FLOWERING GUM TREE

What about something different for a screen or hedge? We are excited about our range of Corymbia and our selections of stunning grafted ficifolias are expending steadily. These are truly the bees-knees in flowering gums. Planted now, you will be amazed by their fullness and colour in nine months time. These are breathing fresh air into the native marketplace and we are working hard to sustain quality supply in 50 litre containers. Order now to avoid disappointment.

Angophora costata

SMOOTH-BARKED APPLE MYRTLE TREE, RUSTY GUM TREE

Under the category of commanding shade, this large evergreen tree with dense foliage and broad domed crown is loved for its smooth bark, and large twisted limbs. Its bark is shed in large flakes in spring when the older pale grey bark makes way for new bark which is salmon-pink in colour. At this time, young foliage appears across the tree giving it a deep burgundy red tinge, gradually fading to green. Foliage is curved, and waxy, providing excellent contrast to the bark. This tree provides transient colour interest as well as shade - a beautifully rare combination.

Corymbia ficifolia 'Fairy Floss'

GRAFTED FLOWERING GUM TREE

Under the category of bold flowering this is another beautiful grafted gum. 'Fairy Floss' grows 4-8 metres tall and is perfect for small gardens, parks and streetscapes. We offer these in 50L containers. Be sure to contact us soon as these will definitely go quickly.
