Low Allergen Evergreen Trees

Looking for evergreen tree selections suitable for low allergen gardens?

Allocasuarina littoralis

BLACK SHEOAK TREE

An erect conical shaped tree which has dark fissured bark which looks black at certain times of the year. This fast growing tree bears showy red male flowers in spring. The female has small spiky cones

Banksia integrifolia 'Sentinel'

'SENTINEL' BANKSIA TREE

This is a small shrub with medium frost tolerance for use as a dense narrow flowering screen. Preferring full sun to light shade it produces upright lemon brush-like flowers from late summer to winter. Responds well to pruning.

Corymbia citriodora 'Scentuous' (syn. 'Dwarf Pink')

'SCENTUOUS' DWARF LEMON-SCENTED GUM TREE

This is a slightly narrow-domed Corymbia (syn. Eucalyptus), developed by Speciality Trees, doesn't shed its branches. It has a smooth trunk that may be slightly mottled. The bark is a pinky-salmon in colour. Leaves are narrow and highly aromatic when crushed smelling strongly of lemon. This tree features lovely cream-coloured flowers in summer.

Corymbia eximia nana

DWARF YELLOW BLOODWOOD TREE

A smaller version of Corymbia eximia (syn. Eucalyptus), the foliage is broad with a strong green colour and may turn a paler yellow/green in the colder months. The trunk adopts a gnarly, crooked appearance with mottled brown bark and in Spring the tree puts on an eye-catching display covering itself in creamy yellow flowers, attracting nectar loving birds.

Eucalyptus melliodora

YELLOW BOX TREE

This tree is a medium to tall grower, best known for its unusual bark which varies from smooth to rough all the way down the trunk. Often the bark varies presenting an array of colours including grey, yellow, red and brown and occasionally, can be very dark and rough. Very fragrant, white flowers appear during the warmer months.

Eucalyptus polyanthemos

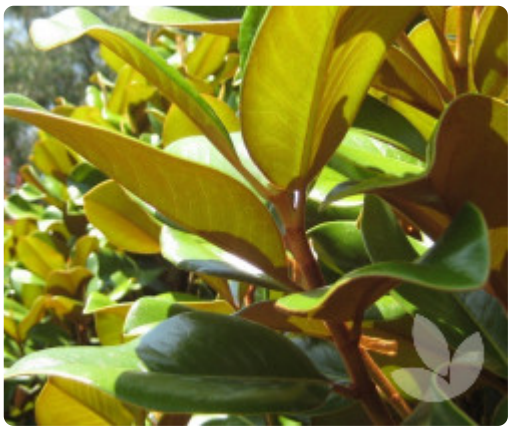
RED BOX TREE

This Australian native tree grows naturally down the central tablelands of New South Wales to Victoria, and across as far as Ararat. A tough tree, it is capable of tolerating difficult, dry stony soils. Juvenile foliage is oval in shape and grey-green in colour whilst the mature, adult leaves are more ovate. The short trunk can be smooth or box-like (fissured). Flowering occurs from September to January during which small white flowers appear.

Hymenosporum flavum

NATIVE FRANGIPANI TREE

Commonly known as the native Frangipani, although not related to the exotic form, this tree bears highly fragrant flower clusters that start out cream and turn to yellow. It is a rainforest tree native to Queensland and New South Wales and its large, glossy leaves give it a tropical look. Growing to 8 metres in ideal conditions, it is capable of providing a nice canopy and the flowers are great for attracting birds and native bees.



Magnolia grandiflora 'Teddy Bear' ™

TEDDY BEAR MAGNOLIA TREE (EVERGREEN)

This is an evergreen, upright growing magnolia reaching 4m. Being naturally dense in habit, with a tight, compact form, it is ideal used as an informal hedge. Leaves are large and rounded - glossy and dark green on top with felted, bronze undersides. Sporadic large white flowers appear during the warmer months from late spring through to autumn.
