

Petite selections for screening

Screening for small spaces

Banksia integrifolia **COASTAL BANKSIA**

A lovely and distinctive native. It has long green leaves with a silver underside and pale yellow cylindrical flowers from summer to winter. We have this tree in a range of sizes available now, from 30cm, 40cm through to 150 litre bags.

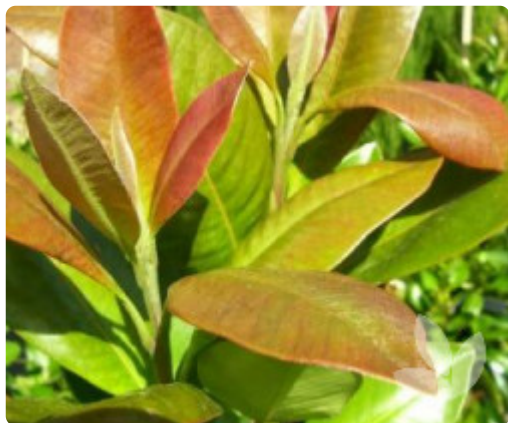

Magnolia grandiflora 'Little Gem' **LITTLE GEM MAGNOLIA (EVERGREEN)**

Growing 6m tall x 3m wide, this is a very popular tree for compactness and density. A great selection for a two tone screen, as the leaves are glossy deep green with a furry brown underside. Talk to us anytime for a range of sizes: 20cm, 30cm, 40cm, as well as 50, 100, 150 and 200 litre bags. As you can see all heights are covered from under 1 metre to over 3 metres tall.

Hakea salicifolia **WILLOW-LEAFED HAKEA**

A beautiful small tree or large shrub that we grow bushy and full to the ground so it can be used as a native screen should you need privacy in a bushland setting. We have great looking stock available now in 50 litre bags at around 2 metres tall.

Tristaniopsis laurina 'DOW10'

Luscious ® 

LUSCIOUS KANOOKA GUM, WATER GUM

This is a good selection for a screen with shiny dark green leaves that are slightly larger than those found on straight *Tristaniopsis laurina*. We like this one because it offers copper tonings on new growth (as pictured) all with interesting purple bark that peels to reveal a smooth cream trunk. Talk to us now on 30cm and 50 litre stock!
