

Time to Define Your Space

Outdoor spaces are an excellent extension of the home. We all love to escape to our own space, whatever your preference, there are loads of options to help make an outdoor space your own.

Syzygium australe 'Hinterland Gold'

This is an ideal native shrub for hedging and screening due to its neat form and compact foliage. It also grows a useful 3 metres wide so great lateral coverage is on offer too. This appears to be our tree of the moment, and we have amazing looking stock in 40cm/27L, 50cm/52L and 100L bags.

Acmena smithii 'BWNFIR Firescreen PBR'

CREEK LILLY PILLY

An attractive Australian native fast-growing shrub or small tree. It has a slightly broader leaf than straight Acmena smithii and a semi-pendulous, dense growth habit right to ground level. The new growth is glossy and copper red in colour, maturing to mid green. We have great numbers in a number of sizes: 40cm/27L and 50cm/52L containers, but you will need to be quick!

Juniperus chinensis 'Spartan' **GREEN SPARTAN JUNIPER**

This conical shaped conifer has a beautiful upright growth habit and dark green foliage. With a dense growth habit it is a favourite for both hedges and screens depending on your needs. As an aside, it is great for topiary as well as it responds really well to pruning. Ask us to flick you an image of the 40cm or 50cm stock. Or visit us direct! Stock looks fantastic!

Magnolia grandiflora 'Kay Parris'

We are a wrap for Magnolia 'Kay Parris' at the moment. Growing more open than 'Teddy Bear' this is a beautiful dense tree with unique wavy dark green glossy foliage. Creamy white flowers in May is an added bonus and would top off the most stunning screen. Again, there are plenty of options: 30cm, 40cm/27L, 50cm/52L and 100L bags are a 'must see'.

Quercus palustris 'Pringreen' - Green Pillar®

This is a columnar-shaped Pin Oak great for driveways and avenue plantings - in fact anywhere where height is required but planting space is restricted. It has deeply lobed vibrant green foliage which turns various shades of bronze and deep red in the autumn months. Reserving a quantity is recommended particularly in the 50cm/52L container size.

Syzygium australe 'AATS' PBR Pinnacle™

Well, what can be said of 'Pinnacle' that hasn't already be said? This is a very popular tree with one very special attribute: It grows upright and narrow. Think of it as a native substitute to Italian Pencil Pine. Ideal for driveways and footpaths: anywhere where you required height and form to guide the eye in a particular direction. We have great numbers in 50cm/52L and 100L bags, ready to go for your landscape.
