

Acer palmatum 'Dissectum Waterfall (weeping standard)'

This variety is a cultivar of weeping lace-leaf Japanese Maple. Foliage is very pendulous with foliage colour going from bright green in spring and summer to a stand-out yellow with hints of crimson or orange in autumn. The weeping branch structure gives the tree a waterfall effect hence its name.

Ours are grafted to 1.8m tall and work well as a feature tree. Great for landscape contrast in colour, height and form.

Like a humus-rich moist soil in a shaded position protected from afternoon sun and hot winds.

Foliage	Deciduous
Form	Weeping
Mature Size	1.5-1.8m grafted
Family	Sapindaceae
