

Acer palmatum 'Dissectum (weeping standard)'

WEeping MAPLE

A beautiful low growing Japanese Maple with lace-like leaves and a drooping habit. The leaves are very fine with deeply lobed serrated edges. Adds great colour in autumn and great texture in spring and summer.

Most Japanese Maples make wonderful feature trees due to their shape, leaf shape and colour. They are very suitable for courtyards with protection from full sun and hot winds.

Prefers being planted in a protected area of the landscape away from full sun. As the sun and hot winds can damage the leaves. Does prefer a moist well drained soil.

Foliage Deciduous

Form Weeping

Mature Size 1.5-1.8m grafted

Family Aceraceae

Deciduous

Weeping
