

## Acer platanoides 'Crimson Sentry'

This is a flashy crimson foliaged maple with dense upright branching. It has a compact growth habit with large crimson leaves in summer turning to gold and orange in autumn. Adds great colour contrast foliage. This is a small tree with grey-black bark that is lightly textured.

Due to its compact size and stunning colour, this maple is highly suitable for smaller landscapes, particularly as a garden feature. Great foliage contrast and stunning colours throughout the year. A good selection for screening and for narrow sites.

Prefers moist but well-drained soils. Is somewhat tolerant of poor soils, moderate heat and air pollution. A tough hardy tree for tough sites that is low maintenance once established.
