

Acer x freemanii 'Autumn Blaze'®

ALSO KNOWN AS ACER X FREEMANII 'JEFFERSRED'

A larger Canadian maple with rich dark green foliage that changes to dark pink then intense red in late autumn. The bark is dark greyish brown becoming furrowed with age. Flowers are small and red in late winter/spring.

A beautiful specimen due to its intense autumnal colouring, it is also useful in amenity plantings - for car parks, gardens around buildings, medium to large properties and for street, avenue and park landscapes.

Prefers full sun for best growth and colour development and can tolerate a wide range of soils and climatic conditions.
