

Acer x freemanii 'Jeffersred'

AUTUMN BLAZE MAPLE

This is a medium to large shade tree with ascending branches when young, maturing to a more rounded canopy. Known for great autumn colour. The traditional maple-shaped leaves turn lipstick red in the autumn providing fantastic contrast to its green surroundings. The bark is smooth and dark greyish brown.

A good selection for avenue and driveway plantings due to its brilliant autumn colour. Works well as a feature tree for larger properties, parks and gardens.

Performs best in full sun. Tolerates a broad range of soil and climatic conditions including relatively wet sites.

Foliage	Deciduous
Form	V-Shaped
Mature Size	13 x 10m
Family	Aceraceae
