

Acmena smithii 'Sublime'TM DOW30 PBR'

This is a lovely mid-sized tree with refreshing lime new growth and dense foliage to the ground. A great option for hedging or screening to around 5m tall. Masses of white fluffy flowers appear in summer with minimal berry production.

A good selection for hedging or screening or as a topiary feature.

Plant in full sun to part shade. Does tolerate a wide range of conditions including heavy clay loams and is tolerant of drought and coastal situations. Like most species, 'Sublime' prefers fertile, well-drained soil rich in organic matter. Tolerates light frosts but expect tip burn. Coastal plantings require protection. Fertilise with slow release fertiliser in late winter and early autumn.

Foliage	Evergreen
Form	Columnar
Mature Size	5 x 2-3m
Family	Myrtaceae
