Agonis flexuosa

WILLOW MYRTLE, WEEPING PEPPERMINT WILLOW TREE

An attractive medium-sized tree with a pendular weeping habit. It has clusters of small white flowers that grow on the branches in between the leaves in spring and summer. Has nice long thin shiny leaves that hang from the drooping branches giving it an all-over similar appearance to a Willow tree.

A great specimen plant or native alternative to a Willow tree. Great in streetscapes and parks and gardens.

Full sun is best and works well on the coast in sandy soils. A very hardy tree that can tolerate a range of soil types and positions does prefer a moist, well drained soil.

Foliage	Evergreen
Form	Pendulous
Mature Size	10 x 5m
Family	Myrtaceae, tribe Leptospermeae

Medium **Evergreen** **Pendulous** **Avenue** **Coastal** **Feature Foliage** **Group Planting** **Informal Screening**

Native **Shade Tree** **Specimen**
