

## Cephalotaxus harringtonii

### KOREAN PLUM YEW

A slow-growing evergreen shrub with attractive dark green finely pointed foliage. It produces fruit which is edible. Suited to a protected position with some part shade.

This large shrub looks great mass planted in gardens where its structured foliage can be maximised.

Plum yew grows well in sandy, well-drained soil. Where climates are cool it can be planted in full sun, but otherwise prefers partial sun. It appreciates protection from strong winds.
