

Citrus limon 'Lisbon'

LISBON LEMON TREE

This variety is believed to be the most commonly grown lemon in Australia producing very high quality lemons with a thin skin, good juice and high acidity. Once a year it produces a heavy crop of fruit in mid winter to early spring.

With some room, this fruit tree will make a handsome statement as a specimen tree in the landscape. A good choice for more extremes of heat, wind and cold within its range. Bears juicy lemons year-round in most areas.

Prefers sites with well drained soil and likes a regular watering schedule during the first growing season to establish a deep, extensive root system. Trees can be pruned back in winter.
