

Tree	 <p>Acer monspessulanum MONTPELLIER MAPLE, FRENCH MAPLE</p>
Description	<p>A slow-growing small shrub-like tree with dense branching to 6-12m in height with an oval to rounded form. The trunk is corky while branches tend to be smooth. Leaves are dark green and flowers are yellow-green and grow in clusters. The foliage turns a bright red and orange foliage in autumn. The flying fruits or Samaras also turn bright red. Produces samara fruit that can take on a reddish tinge. Can be mistaken for Acer campestre.</p>
Foliage	<p> Deciduous</p>
Form	<p> Round</p>
Mature Size	<p>6-8 x 6-8m</p>
Uses	<p>This tree is well-suited for streets, small gardens and urban landscapes. It responds well to pruning - even quite hard pruning - and can be easily hedged to form a screen. Its natural habitat is the Mediterranean where it grows as a large shrub to a small tree.</p>
Position & Soil	<p>Montpelier Maple adapts to most soil types but is intolerant of saline and sodic soils. Grows in full sun to part shade.</p>
Features	<p>  Small  Deciduous  Round  Feature Foliage  Group Planting  Informal Screening </p>
