

Tree	 <p>Acer saccharinum 'Pyramidale' PYRAMIDAL SILVER MAPLE</p>
Description	<p>This is a large deciduous tree with a columnar form in early years, developing a more rounded crown in maturity making it pyramidal in shape. Foliage is dark green with a grey-white underside. In autumn, foliage turns a yellow and bronze with new spring growth opening in redish-blue tones. Flowers are greenish-yellow but inconspicuous. Considered a fast-growing but shallow-rooted with strong branching roots and fibrous rootlets.</p>
Foliage	<p> Deciduous</p>
Form	<p> Round</p>
Mature Size	<p>20 x 12m</p>
Uses	<p>With competitive surface roots, this tree suits areas where fast shade is needed. Pretty autumnal colour makes it an attractive feature.</p>
Position & Soil	<p>This tree is known for having a high tolerance for poor soils, heat and drought.</p>
Features	<p>  Large  Deciduous  Round  Avenue  Feature Foliage  Shade Tree  Specimen </p>
Pot sizes in production	
Substitutes	<p>• Acer campestre 'Elsrijk'</p>
