

Acmena (syn. Syzygium) smithii
'DOW30' Sublime TM

SUBLIME CREEK LILLY PILLY

This is a lovely hardy foliage-feature tree with refreshing lime new growth and dense foliage to the ground. A great option for hedging or screening to around 5m tall. In summer, some white fluffy flowers appear, berry production is unlike other Lilly Pillies, with minimal quantities of small edible deep to light mauve berries that don't stain surfaces if left or crushed.

 Evergreen

 Columnar

5 x 2-3m

A good selection for hedging or screening, or as a topiary feature. Suitable for planting near pools as it has a fibrous root system with a smaller footprint. A great alternative to Ficus hillii 'Flash' where larger root systems are a concern, or where green foliage needs to be maintained through Winter as 'Sublime' isn't susceptible to yellowing or spotting from the cold.

Plant in full sun to part shade. Does tolerate a wide range of conditions including heavy clay loams and is tolerant of drought and coastal situations. Like most species, 'Sublime' prefers fertile, well-drained soil rich in organic matter. Tolerates light frosts but expect tip burn with heavy frosts. Coastal plantings require protection. Fertilise with slow release fertiliser in late winter and early autumn.

Features	 Small  Evergreen  Columnar  Avenue  Coastal  Driveway  Feature Foliage  Formal Screening  Group Planting  Hedging  Informal Screening  Native  Signature Trees
Pot sizes in production	• 40cm/27L (1.2-1.5m) • 50cm/52L (1.5-2.0m) • 100L (2.2-2.5m)
Substitutes	• Cupaniopsis anacardioides
