

<p>Tree</p>	 <p>Adenanthos sericeus 'Silver Streak' SILVER WOOLLY BUSH</p>
<p>Description</p>	<p>Known commonly as 'Woolly Bush', this Australian shrub-like tree is covered in fine, ferny silver grey/green foliage giving it a 'soft' appearance and soft to the touch. A great tree with brilliant red small flowers in amongst the foliage.</p>
<p>Foliage</p>	
<p>Form</p>	<p>🌳 Shrub</p>
<p>Mature Size</p>	<p>2 x 1.5m</p>
<p>Uses</p>	<p>This is an attractive native shrub-like tree used for contrast in the landscape, as a specimen tree or can be hedged for a unique soft affect. Tip pruning gives the bush a great shape although pruning is not necessary. Great native alternative to a xmas tree when grown in a pot.</p>
<p>Position & Soil</p>	<p>Very drought tolerant and low maintenance as it requires very little water. Prefers dry summers rather than a humid climate.</p>
