This attractive Australian native Angophora (syn. Eucalyptus) is loved for its smooth bark that is slightly purple in colour. It has large and twisted limbs, a very large expanded trunk base and white flower clusters that appear in Spring. This tree has opposite leaves, compared to alternate leaves seen in eucalyptus. It has beautiful red new growth. This variety, developed by and exclusive to Speciality Trees. Foliage Form Round Mature Size 20 x 12m Uses A great feature tree. Position & Soil All soils, in a full sun or part shade position.
