CUT LEAF BIRCH Description This attractive tree has a pryamidal to ovate shape. The unusual feathery foliage is light green in spring and summer. In autumn the leaves turn a brilliant yellow. When the tree matures the leaves form a drooping effect due to lateral branches. It has an ornamental white trunk that sheds in paper-thin strips. Foliage Form ② Deciduous Form 12 x 5m Uses An attractive specimen tree for medium to large gardens. Looks stunning in group plantings especially avenue planting. Great feature tree that can also be used in streetcapes. Fosition & Soil Grows well in most soils in a sunny to part shade position. Do not prune in late winter or spring as this causes it to bleed profusely. Features ② Large ③ Deciduous ④ Branches Ascending ④ Avenue ⑤ Feature Foliage ⑥ Group Planting ⑥ Informal Screening ⑥ Specimen Pot sizes in production *40cm/27L (1.2-1.5m) *50cm/52L (1.8-2.2m) Substitutes	Tree	Betula pendula dalecarlica
