Tree	Corymbia maculata
	SPOTTED GUM
Description	This is a stately native Corymbia (syn. Eucalyptus) which grows straight and tall. The bark sheds in summer and is smooth and cream in colour with grey spots from the older bark, providing contrast and interest with its mottled appearance. The leaves are dark green and glossy and from autumn to winter, small clusters of fragrant white flowers appear attracting birds and honeybees to the area. Note: Not to be confused with the "Red Spotted Gum" which is listed separately.
Foliage	& Evergreen
Form	( Oval
Mature Size	30 x 10m
Uses	A highly valued ornamental tree commonly used in large gardens and parks and is known for not dropping limbs. Ideal habitat for native fauna.
Position & Soil	Adaptable to most soils this tree prefers to grow in full sun and is also drought and frost tolerant. Soils must be well drained.
