Tree	 **Lagerstroemia indica x fauriei 'Biloxi'** CREPE MYRTLE TREE (PINK)
Description	This tree is best for its beautiful pink flowers which have a crinkle-like effect and are borne in clusters in late summer. The leaves are dark green but turn orange before shedding in late-autumn. We grow this tree with a single trunk. This tree is a larger-growing variety than the closest pink variety - 'Sioux'
Foliage	Deciduous
Form	V-Shaped
Mature Size	8 x 5m
Uses	A great feature tree for home gardens. Seasonal beauty with smooth winter limbs and summer flower bracts. With good autumn colour and long summer flowering, this variety makes a great specimen tree for the small garden or landscape. Works well in streetscapes and is a clever choice for space-limited landscapes. Relatively-hardy, this variety is resistant to powdery mildew and will tolerate periods of dryness once established.
Position & Soil	Prefers humus rich, well drained soils, in full sun.

Features	Small Deciduous V-Shaped Avenue Coastal Feature Bark Feature Flower Group Planting Shade Tree Specimen
