

Tree	 <p>Prunus armeniaca 'Glengarry' GLENGARRY APRICOT (LOW-CHILL)</p>
Description	This is a heavy cropping variety of Apricot with small golden fruit with a slight blush. A large, vigorous tree. Glengarry works well in both cold-temperate, warm-temperate and some subtropical climates, as it requires low chill hours.
Foliage	 Deciduous
Form	 Round
Mature Size	3 x 3m
Uses	Good for fresh fruit, jams and preserves. As a low-chill variety, this is one of a few varieties of Apricot that will produce fruit in the subtropics. Glengarry is also the best cold-hardy Apricots for cold-temperate areas.
Position & Soil	Plant in a sunny position with well-drained soil. Fertilise and prune every year to encourage new growth and fruit the following year.
