

Corymbia citriodora 'Scentuous' syn. 'Dwarf Pink'

This is a slightly narrow domed tree that doesn't shed its branches. It has a smooth trunk that may be slightly mottled. The bark is a pinky salmon in colour. Leaves are narrow and highly aromatic when crushed smelling strongly of lemon. This tree features lovely cream-coloured flowers in summer.

Due to its smaller size, it is very versatile, making it great for gardens of all sizes and perfect for streetscapes. The bark and flowers add colour and native habitat all year round.

This corymbia prefers a well drained soil in a full sun position. It can tolerate frost and drought. It tolerates a range of soils and grows rapidly with or without moisture.
