

Elaeocarpus reticulatus 'Dark Pink Elly'

DARK PINK ELLY BLUEBERRY ASH

Elaeocarpus reticulatus also known as Blueberry Ash, is a strikingly beautiful native tree producing masses of white and sometimes pinkish flowers. This new variety is a narrow-growing form suitable for screening or as a feature tree in a tight space.

As this species grows half the size of normal Blueberry Ash, it appears to be a clever inclusion for designs that require full foliage cover with mass flowering in a compact space. Great for screens and hedges.

Works best in a humus rich soil, in a sunny position.

Foliage Evergreen

Form Fastigate
