

Elaeocarpus reticulatus 'Green Dream'

GREEN DREAM BLUEBERRY ASH

This is a versatile small native tree, producing finer, glossy green foliage with a denser growth habit than straight *Elaeocarpus reticulatus*. It produces masses of dainty pale pink and white flowers, followed by bright blue shiny fruit which are bird attracting.

Great as a specimen or feature tree. Growing to 3m tall it can also be clipped into a hedge. Useful as a screen or windbreak.

Grows in a range of climatic conditions including hot, humid tropics in the north to cool temperate areas in southern states. It is also suitable for coastal areas. Pruning is not necessary but can be done to maintain a more compact form.
