

Eucalyptus cladocalyx nana

DWARF SUGAR GUM

This Australian native is a medium sized tree, usually multi stemmed, stout and solid in its growth habit. It is a much smaller growing tree than regular E. cladocalyx. It has yellow and blue-grey coloured bark with a mottled appearance. The foliage is a glossy dark green on top with paler undersides. During the warmer months, yellow flowers are produced, followed by large gumnuts.

A great tree for smaller gardens. Can also be used for parks and gardens or street trees. Provides good shelter.

Tolerates well-drained soils in a sunny position. Is considered very hardy and drought tolerant.
