

## Eucalyptus morrisbyi

### MORRISBYS GUM

This is an Australian native tree originating from Tasmania growing to approximately 8m in height. It has round leaves and upper trunks that have smooth bark being light white-grey or pink-grey in appearance. It is listed as an endangered species. Flowers are produced between February and May. Bird and insect attracting.

This is a selection suitable for small native gardens and landscapes, parks and streetscapes.

Is tolerant of most soil types but prefers humus rich conditions.
