

Eucalyptus scoparia

WALLANGARRA WHITE GUM

This medium-sized Australian native tree originates from the elevated areas of the Wallangarra area in northern New South Wales. It is relatively fast growing with a short smooth trunk which is powdery white to grey in appearance and sheds. The broad, spreading crown has an open, weeping habit and bears narrow, shiny green leaves providing beautiful, dappled shade. In spring and summer, small white flowers appear followed by little oval gumnuts.

Great for streetscapes and avenue planting because of its medium height. Works in medium to large gardens. Great for habitat for native fauna.

This tree comes from areas of very poor gravelly soils but can tolerate most. It manages heat and dry conditions as well as urban compaction.

- Foliage** Evergreen
- Form** Pendulous
- Mature Size** 8-12 x 5-10m
- Family** Myrtaceae
