Eucalyptus torquata

CORAL GUM TREE

This is a small to medium spreading native tree with rough grey to black bark on the trunk and larger branches. The bark flakes rather than peels. Leaves are lanceolate and grey-green in colour. Flowers are large and normally coral-pink in colour.

Due to its compact size this tree is a perfect native for small to large gardens and makes a great streetscape tree. Also good for large landscapes and gardens.

Prefers well-drained soils and can withstand dry conditions but does better with regular moisture. Refrain from high phosphorus fertilisers.

Foliage	Evergreen
Form	Oval
Mature Size	6 x 3m
Family	Myrtaceae
