

Ficus microcarpa hillii 'Flash'

Foliage	Evergreen
Form	Oval
Mature Size	10 x 3m
Family	Moraceae

This could be a tall spreading shade tree, but mostly we see this tree ordered for its thick foliage and suitability for instant hedging and screens. 'Flash' has super attractive foliage that consists of different shades of green. They are great for clipping into a tight formal hedge, as a topiary specimen or a screen to 10m if left untrimmed. Just prune to keep shape! They also cope well in many growing situations and soils, in full sun or part shade.

Can be used as a feature tree in a standard form or just let to grow free. Although its dense foliage and fast growing habit lends itself well to screening and hedging.

Prefers most soils in a full sun to part shade position. Can handle root disturbance and wet conditions. A Highly adaptable tree to almost any condition.
