

Firmiana simplex

Foliage Deciduous
Form Round
Mature Size 15 x 10m
Family Malvaceae

CHINESE PARASOL TREE

Native to Asia, this is a deciduous tree with large maple-like shaped leaves that are a glossy green turning yellow in autumn. Bark is grey and smooth. Panicles of small yellow-green bell shaped flowers in spring produce pretty paper-like fruits that contain seed.

Growing to 15 or so metres, this is an impressive feature trees for medium to large gardens.

Prefers full sun to part shade and a position sheltered from strong winds. Dislikes frost, so this variety needs to be planted in a warmer climate or a protected position in gardens with a temperate climate. It will grow in an open aspect and tolerate a range of different soils.
