

Fraxinus pennsylvanica 'Cimmzam'

CIMMARON ASH

This is a striking feature tree which provides great summer shade. It has a uniform branch structure with bark which becomes deeply furrowed as it matures. Attractive dark green foliage is lighter on the underside and transitions through an array of colours starting with yellows, orange, fiery reds and rich burgundy as the weather cools in autumn. The leaves hold onto the tree longer into winter than other varieties of this species.

Its height and striking autumnal colour make it a sought after feature tree suitable for a range of residential and commercial applications.

Likes moist, humus-rich soils but can tolerate a range of urban conditions, some wind and some drought. Performs best in full sun. It is suitable for a wide variety of both residential and commercial projects and has a moderate growth rate.
