Ginkgo biloba '(Male)'

MAIDENHAIR TREE (MALE)

This is a very slow-growing and long-lived, deciduous tree with a large and elegant habit. Considered an ancient tree, it is known to have origins dating back to Jurassic times. It has unique, double-lobed, fan-shaped leaves with veins which spread from the stalk of the leaf. Short catkins are produced, followed by yellow fruit and the foliage is a rich green, which turns a golden yellow in autumn.

A fantastic feature tree in all gardens adding great colour in autumn. Can be used in parks and many landscapes. Leaves from this tree can be used for teas.

Can grow in almost any position but best in moist, deep, fertile soil. Full sun or part shade.

Foliage	Deciduous
Form	Horizontal Branching
Mature Size	12 x 5m
Family	Ginkgoaceae

Medium **Deciduous** **Horizontal Branching** **Avenue** **Feature Foliage** **Group Planting** **Shade Tree** **Specimen**
