

Gleditsia triacanthos var. inermis 'Shademaster'

GREEN HONEY LOCUST

This is a large, fast growing, deciduous tree with a pendulous habit. The dark green bipinnate leaves turn a rich yellow colour in autumn, hanging gracefully from the tree well into the season. It is a popular selection for streetscapes and parks and a great choice for a feature shade tree in a larger garden.

A great stunning feature tree. Can also be used in parks and gardens as it is a great filtered shade tree.

Best suited in deep, fertile, well-drained soil and in a full sun position. Can tolerate a wide range of growing conditions. Tolerates air pollution and urban conditions.

Foliage	Deciduous
Form	Pendulous
Mature Size	12 x 10m
Family	Fabaceae
