

Gleditsia triacanthos var. inermis 'Sunburst'

GOLDEN HONEY LOCUST

A beautiful, deciduous tree with a broad, open, spreading canopy and soft, weeping, hanging, pendulous branches. Young foliage, bipinnate leaves, start off a bright yellow colour and ripens to lime green. In winter, large black seed pods hang from the branches. It is a popular tree due to its vibrant colour and overall graceful appearance. This is a thornless variety of Gleditsia.

Fantastic specimen tree for all sized gardens. Can be used in streetscapes and parklands.

Prefers well drained soils in a sunny position but is highly adaptable to a wide range of conditions. Tolerates air pollution and moderate drought. Ensure any shoots that develop under the graft point are removed cleanly and promptly.
