

Lophostemon confertus 'ST2'

COMPACT QUEENSLAND BRUSH BOX

This variety of Lophostemon, developed by and exclusive to Speciality Trees grows to approximately 8m tall, has a good dense canopy and attractive large leaves that are oval shaped and glossy green in colour. It has attractive salmon-coloured bark that peels in summer. It is summer flowering, producing clusters of small white flowers whose stamens give them a decorative fluffy appearance.

Great for parks and gardens and as a feature tree. It has a more fastigate form over its parent variety making it ideal for streetscape planting.

Prefers full sun in well-drained, sandy/loam soils. Can tolerate dry summers once established.
