

Magnolia grandiflora 'Teddy Bear'

This is an evergreen, upright growing magnolia reaching 4m. Being naturally dense in habit, with a tight, compact form, it is ideal used as an informal hedge. Leaves are large and rounded - glossy and dark green on top with felted, bronze undersides. Gloriously large white flowers appear during the warmer months from late spring through to autumn.

Makes a great feature tree in any size garden. Also good in streetscapes and parks. Due to its tight form, 'Teddy Bear' can make a fragrant hedge or screen.

Evergreen magnolias prefer a part shade position in humus rich well drained soil. They are a hardy tree and can tolerate most conditions.
