

# Magnolia laevifolia x figo 'White Caviar '(syn. Michelia)

## WHITE CAVIAR MAGNOLIA (EVERGREEN)

This is a cross between two of the most popular, attractive and hardy Michelia varieties; yunnanensis (syn. laevifolia) and figo. A highly ornamental, medium-sized evergreen with a narrow form and dense habit, it is perfect for screening, hedging and espalier. It produces medium-sized, fragrant, creamy white flowers in late spring/early summer which makes it a great stand-alone specimen in the garden as well.

This is a fragrant ornamental Magnolia that can be used mass planted for an informal hedging or screen. Also great as a single specimen.

Prefers a moist, humus-rich well drained soil in a sunny garden position.
