Pistacia chinensis

**CHINESE PISTACHIO**

This lovely small, deciduous tree has a moderate growth rate and great autumn colour in shades of orange, yellow and red. Bark is dark grey with shallow furrows and this variety is capable of withstanding relatively harsh conditions. Interesting pinnate leaves emerge green and leathery and although inconspicuous, clusters of small white flowers are borne in summer, followed by red drupes which mature to blue.

A fantastic feature tree in parks and gardens. Great for street planting. Provides shade for shade loving plants to grow undergrowth. Great for all sized gardens. Prune to keep shape, define the strong single leader and good overall structure.

While it is tolerant of most soil types, a well drained soil in a sunny position is preferred. Moderately drought tolerant.

**Foliage**  Deciduous  
**Form**     Round   
**Mature Size**  8 x 6m   
**Family**     Anarcardiaceae
