

Prunus avium 'Bing'

BING CHERRY

This variety of Cherry produces very large, mahogany red, firm and sweet fruit which have an excellent tangy flavour. Leaves are dark green and smooth. The smooth, glossy, reddish bark is another notable feature of this beauty. Bing cherry trees do not self-pollinate, but if you pair them with a suitable mate such as 'Lapins', 'Stella' or 'Van' they will yield well. They are a mid to late season cherry.

Bing produces fragrant, white flowers and large, heart-shaped fruit. For best growth place it full sun in light, sandy soil that is well-drained, but receives adequate water.

It is suitable for growing in warm temperate and cool temperate regions.

Foliage Deciduous

Form Oval

Mature Size 2-2.5 x 2m

Family Rosaceae

Small

Deciduous

Oval

Fruiting & Edible

Specimen
