

Prunus serrulata 'Shirotae' syn. 'Mt Fuji' (grafted standard)

MT FUJI GRAFTED STANDARD ORNAMENTAL CHERRY TREE

A very popular feature tree for small gardens. This deciduous, ornamental cherry develops a spreading flat crown with branches that droop down slightly. A beautiful display of pure white, semi double blossoms cover the tree in early to mid-spring, followed by finely serrated, pale green leaves which darken to mid green over the warmer months. In autumn, foliage turns shades of orange and red.

As a grafted tree with horizontal branches that fall slightly and its ability to flower, this tree is highly sought after as a feature specimen.

While adaptable to many site conditions, this tree prefers a moist, well drained, fertile soil in a sunny or part-shade position.
