

Pyrus fauriei 'Korean Sun'

This is a compact ornamental pear tree with a dense growth habit. It has a glossy green foliage that changes to bright tones of red and orange in autumn. Flowering seems to occur quite early in spring. Bark is light grey in colour which becomes slightly furrowed with age.

It is a good tree for hedging, screening and used as a barrier. A good tree to have in small to medium- sized gardens.

It is highly adaptable to a wide range of conditions and soils. Has good drought tolerance, and performs best in well-drained soils. Plant in full sun.
