

Syzygium australe 'Hinterland Gold'

HINTERLAND GOLD LILLY PILLY

A native shrub with a dense habit. This is a fast-growing variety well suited to hedging and screens. Compact glossy green foliage develops a lovely coppery hue in the new growth. During the warmer months, white fluffy blossom are borne, followed by fleshy red berries.

Used widely as a hedging or screening plant. Also can be used to add colour and texture to gardens. Great addition to a native style garden. The berries can be used for jams, and infusing gin etc, but are recommended to be eaten raw.

Will tolerate most soils in a full sun to part shade position. Enjoys moist, well drained soils.
