Thuja occidentalis 'Smaragd'

Foliage	Evergreen
Form	Conical
Mature Size	3-4 × 1-2m
Family	Cupressaceae

EMERALD GREEN ARBORVITAE (TREE)

This tree is smaller growing with bright green flat branchlets that slightly weep. The undersides are often a dull grey colour and they are slightly scented. It has a compact pyramidal shape. Thuja varieties are immune to canker disease.

Can be used for screening and great for smaller gardens. Ideal for formal garden designs. Responds well to pruning.

Will tolerate most soils in a full sun position or partly shaded. Prefers well-drained soil but may need watering in dry periods. Responds well to pruning - prune in early spring before onset of new growth. Thuja is not susceptible to canker.
