

# Tristaniopsis laurina 'DOW10' Luscious® PBR'

## KANOOKA GUM

An Australian native, this is an updated version of the straight *Tristaniopsis laurina*. Leaves are dark green, shiny and large - and as the name suggests, luscious in appearance! New growth starts out a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.

Its dense form makes for an attractive hedge or screen. A great summer shade tree or feature tree.

This variety tolerates a wide range of soil and climate conditions including frost. Not suited to very dry climates or exposure to hot winds without regular watering.

<b>Foliage</b>	Evergreen
<b>Form</b>	Oval
<b>Mature Size</b>	8 x 4m
<b>Family</b>	Myrtaceae
